Children In Distress
don't do miracles, but...

Part of the Children who are here series

Hydrocephalus

To cure, sometimes; To help, often; To comfort, always.

...it's amazing what
a little TLC can do!

Over the last 16 years Children in Distress- to care sometimes; to help, often; to comfort, always- has pioneered excellence in dedicated nursing care and therapy for the children of the Balkans, abandoned as beyond help, and suffering HIV AIDS, incurable and terminal illness, hydrocephalus, disability arising from accident, infection or genetic disorders, or those living with the daily challenge of the Autistic Spectrum Disorders (ASD).

Each year, thousands of babies, infants and children are treated, given, either dignity in death, or hope and the chance of a new life, in the Charity's Hospices, Children's Centres, or in their associated Community Nursing, Therapy or Street Children's Early Intervention Education and Socialisation programmes; in our Sheltered Holiday Centre or our School and Support Groups for Children with ASD.

Throughout, this small Charity and its highly trained, motivated and dedicated in-country staff have advocated and fought for the rights of Europe's poorest, most discriminated against and least protected children and working with local and national authorities has by advocacy, encouragement, influence, training, example and the organisation of conferences, seminars and workshops worked to achieve continuous improvements in child care standards and policies

This work is only made possible by the generosity, support and donations from the general public throughout the United Kingdom. Please help us to continue our work and by making a donation save another life today.
